UNITED STATES INTELLIGENCE BOARD

SECURITY COMMITTEE

MEMORANDUM FOR: Chairman, United States Intelligence Board

SUBJECT : Proposed Director of Central Intelligence Directive No. 1/16, "Minimum Security Requirements for Compartmented Operation of Remotely Accessed Resource-Sharing Computer Systems in a Controlled Top Secret Environment"

REFERENCES : a. Memorandum for United States Intelligence Board dated 24 April 1970, Subject: Controlled Multi-level Security Test of DIA Analyst Support and Research System (ANSRS), USIB-D-71.9/1 with attachment

b. Secretary's Notes, Minutes of 14 May 1970 USIB meeting, USIB-M-570 dated 14 May 1970

1. The attached proposed Director of Central Intelligence Directive No. 1/16, entitled "Minimum Security Requirements for Compartmented Operation of Remotely Accessed Resource-Sharing

~~CONFIDENTIAL~~

GROUP 1
Excluded from automatic
downgrading and
declassification

CONFIDENTIAL

Computer Systems in a Controlled Top Secret Environment", has been developed by the Computer Security Subcommittee in partial response to the Board's request outlined in paragraph 1d of Reference a., approved by the Board on 12 May 1970 as noted in Reference b.

2. The proposed Directive sets forth minimum security requirements for the use of remotely accessed resource-sharing computer systems to process simultaneously different types of sensitive compartmented information, when the system as a whole is secured to the Top Secret level but where individual terminal users are not necessarily access approved for all types of compartmented information in the system.

3. The proposed Directive has been approved by the Security Committee and has been coordinated with the Intelligence Information Handling Committee (IHC), the Chairman, Committee on Imagery Requirements and Exploitation (COMIREX), and the Chairman, SIGINT Committee.

4. Development of guidelines for the security testing of resource-sharing computer systems are still under development in the Computer Security Subcommittee. Completion of this portion of the task has been delayed by the considerable effort involved in the development of the proposed DCID No. 1/16. It is anticipated that the guidelines for security analysis, testing, and evaluation of resource-sharing computer systems will be completed by 15 December 1970.
